

# Microsoft® Azure AI Fundamentals

Courseware: **8415-2**

ISBN#: **1-955332-672-4**

Total Pages: **280**

## Course Description

This course prepares learners for the Microsoft Azure AI Fundamentals certificate. Throughout the course, learners will gain a solid understanding of cloud computing and artificial intelligence (AI) concepts. They will learn about the different types of machine learning (ML) and the advantages and disadvantages of AI and ML. In addition, learners will gain insights into the principles of responsible AI.

This course introduces learners to AI in Azure and the different services it offers, including cognitive services, bot services, and Azure Machine Learning. Learners will also learn about the common AI workloads in Azure, such as anomaly detection, computer vision, natural language processing (NLP), and knowledge mining. The course then details Azure Automated Machine Learning and Azure ML Designer, which enable learners to create machine learning models with ease.

Successful completion of the certification exam validates the knowledge and skill sets of individuals seeking employment or advancement in their careers.

**Suggested Course Length: 45-70 Hours**

## Course Prerequisites

This course contains concepts related to using Microsoft Azure as a cloud platform and its products and services. For a more thorough introduction and reinforcement of concepts, you should have an account with Microsoft Azure. You can register for a free account at the Azure website on Microsoft's website and set up the type of subscription you want to use to pay for access to Azure.

## Unit 1: Cloud Computing and Artificial Intelligence

Unit Objectives

### Lesson 1: Cloud Computing Fundamentals

Lesson Objectives  
 Main Computer Components  
 Computer Servers  
 Web Servers  
 Databases  
 Virtual Machines  
 Network  
 On-Premises Systems  
 Cloud Computing  
 Public Cloud  
 Private Cloud  
 Hybrid Cloud  
 Capital Expenditure vs Operational Expenditure  
 Consumption-Based Model  
 Shared Responsibility Model  
 Types of Cloud Services  
 Benefits of Cloud Computing  
 Lesson Summary  
 Practice Exercises  
 Practice Questions

### Lesson 2: AI Fundamentals

Lesson Objectives  
 Artificial Intelligence Definition  
 History of Artificial Intelligence  
 Types of Artificial Intelligence  
 Machine Learning Definition  
 Types of Machine Learning  
 Advantages and Disadvantages of AI and ML  
 Data Science  
 Lesson Summary  
 Practice Exercises  
 Practice Questions

### Lesson 3: AI in Azure

Lesson Objectives  
 Microsoft Azure AI  
 Natural Language Processing Services  
 Computer Vision Services  
 Speech and Bot Services  
 Anomaly Detection Services  
 Knowledge Mining Services  
 Machine Learning Services  
 Lesson Summary  
 Practice Exercise  
 Practice Questions  
 Unit Summary  
 Unit Assessment

## Unit 2: Fundamentals of AI and Machine Learning

Unit Objectives

### Lesson 1: Common AI Workloads

Lesson Objectives  
 Anomaly Detection

Anomaly Detection in Azure  
 Computer Vision  
 Computer Vision in Azure  
 Natural Language Processing  
 Natural Language Processing in Azure  
 Knowledge Mining  
 Knowledge Mining in Azure  
 Lesson Summary  
 Practice Exercise  
 Practice Questions

### Lesson 2: Core ML Concepts

Lesson Objectives  
 Dataset  
 Supervised Learning  
 Unsupervised Learning  
 Reinforcement Learning  
 Deep Learning  
 Lesson Summary  
 Practice Exercise  
 Practice Questions

### Lesson 3: Principles of Responsible AI

Lesson Objectives  
 Fairness  
 Reliability and Safety  
 Security and Privacy  
 Inclusiveness  
 Transparency  
 Accountability  
 Risks and Challenges in AI  
 Lesson Summary  
 Practice Exercise  
 Practice Questions  
 Unit Summary  
 Unit Assessment

## Unit 3: Introduction to ML in Azure

Unit Objectives

### Lesson 1: Data in ML

Lesson Objectives  
 Data Labeling  
 Feature Extraction  
 Training Datasets  
 Overfitting and Underfitting  
 Validation Datasets  
 Validation Metrics  
 Data Processing  
 Lesson Summary  
 Practice Exercise  
 Practice Questions

### Lesson 2: Machine Learning Types1

Lesson Objectives  
 Regression  
 Regression Algorithms  
 Classification  
 Differences in Classification Algorithms  
 Clustering

Lesson Summary  
 Practice Exercise  
 Practice Questions

### Lesson 3: Automated Machine Learning

Lesson Objectives  
 Azure Automated ML  
 MLOps  
 ML Pipelines  
 Azure ML Studio  
 Automated ML Job  
 Advanced Creation of a Job  
 Lesson Summary  
 Practice Exercises  
 Practice Questions

### Lesson 4: Azure ML Studio

Lesson Objectives  
 Authoring  
 Azure ML Designer  
 Azure ML Designer Features  
 Assets  
 Manage ML Service  
 Lesson Summary  
 Practice Exercise  
 Practice Questions

### Lesson 5: Azure ML Service

Lesson Objectives  
 Components  
 Regression with ML Azure Designer  
 Classification with ML Azure Designer  
 Clustering with ML Azure Designer  
 Lesson Summary  
 Practice Exercises  
 Practice Questions  
 Unit Summary  
 Unit Assessment

## Unit 4: Computer Vision in Azure

Unit Objectives

### Lesson 1: Computer Vision Tasks

Lesson Objectives6  
 Image Classification7  
 Object Detection8  
 Optical Character Recognition9  
 Facial Detection, Recognition and Analysis0  
 Lesson Summary2  
 Practice Exercises3  
 Practice Questions4

### Lesson 2: Azure CV Services

Lesson Objectives  
 Computer Vision Service  
 Azure Computer Vision Resources  
 Custom Vision Services  
 Custom Vision Image Classification  
 Custom Vision Object Detection  
 Face Services  
 Read API

- Form Recognizer Service
- Lesson Summary
- Practice Exercises
- Practice Questions
- Unit Summary
- Unit Assessment

## Unit 5: Natural Language Processing in Azure

- Unit Objectives

### Lesson 1: NLP Tasks

- Lesson Objectives
- Key Phrase Extraction
- Entity Recognition
- Sentiment Analysis
- Speech Recognition and Synthesis
- Translation
- Language Modeling
- Lesson Summary
- Practice Exercise
- Practice Questions

### Lesson 2: Azure NLP Services

- Lesson Objectives
- Language Service
- Speech Service
- Translator Service
- Lesson Summary
- Practice Exercise
- Practice Questions

### Lesson 3: Azure Bot Service

- Lesson Objectives
- Language Understanding and Conversational AI
- Bots Features
- Bots Usage
- QnA Maker
- Bot Framework SDK
- Bot Framework Composer
- Lesson Summary
- Practice Exercises
- Practice Questions
- Unit Summary
- Unit Assessment

## Unit 6: Anomaly Detection and Knowledge Mining in Azure

- Unit Objectives

### Lesson 1: Anomaly Detector

- Lesson Objectives
- Anomaly Detector Definition
- Anomaly Detector Process
- Anomaly Detector Usage
- Lesson Summary
- Practice Exercises
- Practice Questions

### Lesson 2: Knowledge Mining

- Lesson Objectives
- Azure Cognitive Search
- Search Solution
- Enrichment Pipeline

- Indexes and Indexers
- Lesson Summary
- Practice Exercises
- Practice Questions

### Lesson 3: Data Query and Storage

- Lesson Objectives
- Knowledge Storage
- Data Query in Cognitive Search
- Result Ranking
- Lesson Summary
- Practice Exercise
- Practice Questions
- Unit Summary
- Unit Assessment

## Unit 7: Generative AI in Azure

- Unit Objectives

### Lesson 1: Introduction to Generative AI

- Lesson Objectives
- Generative AI
- Discriminative AI vs Generative AI
- Importance of Generative AI
- Evolution of Deep Generative Models
- Lesson Summary
- Practice Exercises
- Practice Questions

### Lesson 2: Concepts of Generative AI

- Lesson Objectives
- Working of Generative AI
- Types of Generative AI Models
- Challenges of Generative AI
- Famous Generative AI Tools
- Lesson Summary
- Practice Exercises
- Practice Questions

### Lesson 3: Azure OpenAI Services

- Lesson Objectives
- Azure OpenAI Service
- Benefits of Azure OpenAI Service
- Introduction to Azure OpenAI Playground in Azure OpenAI
- Deploy Models
- Azure OpenAI Service Models
- Lesson Summary
- Practice Exercise
- Practice Questions
- Unit Summary
- Unit Assessment

## Appendices

- Course Book Mapping
- Key Terms
- Index
