General Information

Description

Master the full range of Microsoft Word skills with this comprehensive course, designed to prepare you for the Microsoft Office Specialist: Word Associate Certification (MO-110). This coursebook provides the essential knowledge and hands-on experience needed to navigate Word's interface, format documents, manage text, insert tables and graphics, and collaborate efficiently, which are key skills for professionals, students, and anyone looking to create polished, professional documents.

Whether you're drafting business reports, academic papers, or professional correspondence, this course offers step-by-step instruction to help you develop proficiency in document organization, page layout, SmartArt, and collaboration tools while ensuring you can work effectively within Microsoft 365 Apps.

Course Objectives

This coursebook teaches the skills you will need to successfully complete the Microsoft Office Specialist certification offered by Certiport. These skill sets are introduced using multiple types of exercises and review materials.

After completing this course, you will understand the following:

- Navigate & Customize the Word Interface: Understand the Ribbon, Backstage View, Quick Access Toolbar, and ScreenTips to enhance efficiency.
- Create & Manage Documents: Open, save, and edit documents, including working with templates and converting PDFs into Word files.
- Text Editing & Formatting: Use Find and Replace, Undo/Redo, Cut, Copy, Paste, Font styles, Character Spacing, Drop Caps, and Special Effects for precise text management.
- Page Layout & Structure: Adjust margins, page orientation, columns, section breaks, headers, footers, and watermarks to improve document readability.
- Tables & Lists: Insert and format tables, bulleted and numbered lists, multilevel lists, and custom numbering for organized content presentation.
- Graphics & Visual Enhancements: Work with images, SmartArt, charts, 3D models, icons, and WordArt to create visually engaging documents.
- Collaboration & Review Features: Track changes, manage comments, review spelling and grammar, and apply document protection settings.
- Automatic Formatting & References: Utilize Table of Contents, footnotes, endnotes, bookmarks, cross-references, and citation tools for well-structured documents.

By completing this course, you will be fully prepared to earn the Microsoft Office Specialist: Word Associate Certification (MO-110) and demonstrate your expertise in document management, advanced formatting, and collaboration tools. This coursebook provides everything you need to succeed in Microsoft Word, regardless of whether you're validating your skills for career advancement or refining your proficiency.

Expectations and Goals

Upon completion of this course, learners are expected to complete the Microsoft Office Specialist exams. Candidates for this exam should have a foundational knowledge of word processing fundamentals and how those services are provided with Microsoft Word. The exam is intended for candidates who are just beginning to work with word processing software or are new to Microsoft Word. To learn more about the Microsoft Office Specialist program visit: [Microsoft Office Specialist :: Certiport \(pearsonvue.com\)](https://www.pearsonvue.com/microsoft-office-specialist)

Certifications provide significant advantages to professional and job candidates. These include:

- Higher grade point average for certified high school students
- Higher graduation rates for certified high school students
- Increased post-secondary enrollment
- Reduced dropout rates

Course Materials

Required materials

- XperienceED account
- Computing Device
- Internet Connection

Optional materials

- Headset

Schedule

Dates

Unit

	Unit 1: Getting Started
	Unit 2: Working with Text
	Unit 3: Formatting Documents
	Unit 4: Organizing Text
	Unit 5: Working with Graphics
	Unit 6: Working with Documents

Course Structure

The course is structured to learn by doing, practice the learned skill, then apply the skills.

- Unit
 - Lesson
 - Learn Tasks
 - Practice Exercises
 - Practice Questions
 - Objective Assessment
 - Create Project

Each unit contains lessons. The lessons are introduced by lesson topics where you can learn through doing or learn through study materials (eBook, QuickDeck or QuickClip). Each lesson concludes with a Practice Exercise that incorporates the tasks you have learned throughout the lesson. Once you have completed the lessons in the unit, you are assessed through a question-based Objective Assessment and a Create Project.

Instructor Guide Overview

Course Structure

The course is structured to learn by doing, practice the learned skill, and then apply the skill.

- Unit
 - Lesson
 - Learn Tasks
 - Practice Exercises
 - Practice Questions
 - Objective Assessment
 - Create Project

Each unit contains lessons. The lessons are introduced by lesson topics where learners can understand through doing or learning through study materials. Each lesson concludes with a Practice Exercise that incorporates the tasks they learned throughout the lesson. Once they have completed the lessons in the unit, learners are assessed through a question-based Objective Assessment and a Create Project.

Delivery

The course is created so it can be customized to meet the needs of the instructor and the learner.

- **Direct Instruction:** Utilize the PowerPoint presentations to introduce each lesson topic, then have the learners review the study materials and complete the task.
- **Flipped Classroom:** Learners complete lessons outside of class time. Learners utilize the class time to discuss learned tasks, allow learners to teach concepts, expand concepts through learning stations, and work on unit extension or unplugged activities.

Differentiation

- **Applied Learning Resources:** Applied exercises outline what learners need to complete. Learners study the concept and then apply that knowledge to complete the Learn Task. These exercises reinforce independent problem-solving and help learners demonstrate mastery.
- **Guided Learning Resources:** Guided learning resources provide step-by-step instructions to support learners in completing the Learn Task. These resources scaffold the process, ensuring that learners can successfully practice and build confidence as they progress through the content.

- **Extension Activities:** Encourage learners to showcase their newly learned skills by creating additional real-world projects, teaching others how and why to use new skills, and exploring beyond their learning.

Prepare for Delivery

- Begin with the unit overview to understand the structure and flow of the unit, the topics covered, the approximate time to complete and the exam objectives reviewed.
- Review the lesson PowerPoint Presentation to give you an in-depth look at each lesson topic and the comprehensive topic notes included.
- Review the answer keys to familiarize yourself with the tasks learners will complete throughout the lesson.
- Complete the lesson.

	<ul style="list-style-type: none"> • Objective Assessment – A comprehensive question and answer-based assessment for the unit.
Answer Keys	<p>Documents containing answers, step-by-step instructions, and correct answers for Instructor reference or to offer additional support material for learners.</p> <ul style="list-style-type: none"> • Learn Tasks - Each lesson topic includes an opportunity to apply what they have just learned or by answering questions. • Lesson Practice Exercises – End of lesson exercises or scenario-based assessment. • Lesson Practice Questions – End of lesson question-based assessment.
Study Guides	<p>Printable and customizable study guides mapped to lesson topics and exam objectives are provided in three formats.</p> <ul style="list-style-type: none"> • Complete- This version includes the topic and the explanation. • Fill-In Topic-Learners can fill in the topics as they learn or as a review. • Fill-In Explanation – This allows learners to complete the explanation of each lesson topic in their own words and images.
Learning Plan	<p>Customizable unit learning plan outlining the objectives and topics covered, essential questions, learning targets, methods and materials, extension activities, formative and summative assessments, mapping to STEAM, Work Readiness, 5 C's, and Bloom's Taxonomy Levels.</p>
Lesson PowerPoint	<p>A PowerPoint Presentation that complements the lesson. Each lesson topic is included in the presentation as well as comprehensive speaker notes.</p>
Unplugged Activities	<p>A variety of activities and necessary resources to get learners off the computers while still reinforcing unit learning objectives.</p>
Unit Key Terms	<p>A comprehensive list of key terms throughout the unit.</p>
Unit Overview	<p>A spreadsheet containing the overview of the flow of the unit that includes lesson topics, certification objectives mapping, and approximate timings for self-paced and instructor-led scenarios.</p>
Learner Resources	<p>Printable learner resources are available to support both applied and guided learning.</p> <ul style="list-style-type: none"> • Applied Learning Resources – Printable prompts that direct learners to study the concept before applying their knowledge to complete the Learn Task. • Guided Learning Resources – Step-by-step printable guides that lead learners through the process of completing the Learn Task, providing structure and support as they build skills.

Word Learning Plan

Unit 1: Getting Started

Instructor:

Class:

Duration: 6-11 hours

Unit Objectives:

This unit focuses on developing the skills required to proficiently utilize advanced commands and features in document processing software. Learners will gain a deep understanding of document settings and formatting options, and they will learn to efficiently manage and collaborate on documents for various professional and academic purposes, thereby demonstrating their mastery in working with documents.

Essential Questions:

- How can an understanding of Microsoft Word, its interface, and the various commands and features enhance document creation and productivity??
- How can creating new documents, utilizing document templates, and managing file types, empower you to efficiently produce, share, and customize documents for various purposes?
- How can an understanding of Microsoft Word's core functionalities and document settings empower individuals to create professional and organized documents efficiently?

Learning Targets:

I will understand the Word interface and ribbons

So I can create new documents

I know I succeeded when I can adjust document settings according to my needs.

Methods and Materials:

- Lectures
- Reading
- Videos
- Hand-on activities
- Creating
- Analyzing
- Discussing
- Teaching

Formative Assessments:

- Learn Tasks
- Practice Questions
- Practice Exercises

Summative Assessments:

- Objective Assessment
- Create Project

STEAM

- ☐ Science
- ☒ Technology
- ☒ Engineering
- ☒ Art
- ☐ Math

Work Readiness

- ☒ Communication
- ☒ Problem-solving
- ☒ Teamwork
- ☒ Work ethic
- ☒ Empathy
- ☒ Conflict resolution
- ☒ Active listening
- ☒ Time management
- ☒ Adaptability
- ☒ Reading
- ☒ Mathematics

5 C's

- ☒ Critical Thinking
- ☒ Creativity
- ☒ Communication
- ☒ Collaboration
- ☒ Citizenship

Blooms Level

- ☒ Remembering
- ☒ Understanding
- ☒ Applying
- ☒ Analyzing
- ☒ Evaluating
- ☒ Creating

Learning Activities

Lesson	Time Allowed	Content
Commands and Features	65-145 minutes	<ul style="list-style-type: none"> • What is Microsoft Word? • Microsoft Word Interface • Backstage • ScreenTips • Quick Access Toolbar • Ribbon • Ribbon Tabs • Understand Ribbon Tabs
Work with Documents	65-145 minutes	<ul style="list-style-type: none"> • New Documents • Document Templates • Open Documents • Save Documents • Save PDFs • Convert PDFs to Word Documents • Word File Types • Identify Extensions
Document Settings	65-145 minutes	<ul style="list-style-type: none"> • Review Document Statistics • Document Properties • Inspect Document • Check Accessibility • Check Compatibility • Print Preview • Set Print Parameters • Share Documents
Document Views	65-145 minutes	<ul style="list-style-type: none"> • Change the View • Manage Views • Manage Outline View • Zoom • Split the Window • Show/Hide ¶ • Ruler • Gridlines

Warm-Up Activities

1. Take a moment to think about your experience using Microsoft Word. List at least three features or functions that you have used in the past. Consider formatting tools, editing options, or any other aspects of Word that you are familiar with.
2. Explore different types of documents you've encountered or heard of that you might use Microsoft Word for. Select one and briefly describe what type of document it is and why you might need to create it.

Extension Activities

1. Create a portfolio for the course. Portfolios should include evidence of work, reflect on learned skills and how you can incorporate the skills in a current or future project. This is an ongoing extension activity. Continue to add to the portfolio throughout the course.
2. Select one topic learned throughout the unit, then create an instructional video, tutorial, lecture, or hands-on activity to teach others about the skill.
3. Imagine you're a marketing manager at a middle-sized company, and you've got an important job to do. Your team is making a big report that talks about how the company plans to do its advertising for the next few months. This report is going to be shown to the big bosses at your company, the people who have an interest in your company's success, and folks who might invest money in your company. As the time when everything needs to be finished gets closer, you'll face some tough situations where what you've learned about Microsoft Word will be important. Explain why you may need to use the following document statistics, document properties, document protection, and version management.

Unit Evaluation and Reflection

What went well	What needs to change

Unit 1 Commands and Features Learn Tasks

What is Microsoft Word?

Microsoft Word enables you to create which types of files? (Select all that apply)

- a) **Documents (correct)**
- b) **Reports (correct)**
- c) Spreadsheets
- d) **Newsletters (correct)**
- e) Spreadsheets

Microsoft Word Interface

In the Microsoft Word window image identify the following:

- 1) File Tab
- 2) Quick Access Toolbar
- 3) Ribbon Tabs
- 4) Title Bar
- 5) Search Field
- 6) Minimize/Maximize/Restore Down/Close
- 7) Status Bar
- 8) View Buttons
- 9) Zoom Slider
- 10) Zoom Level

Backstage

Practice identifying features in the Microsoft Word window.

- 1) Open Backstage.docx
- 2) View the document info in the Backstage view
 - File tab > Backstage view > Info
- 3) Create a new document
 - New
- 4) Open an existing file
 - Open

- 5) Save the file
 - Save
- 6) Return to the document
 - Back
- 7) Save to your course files

This feature is only available in the desktop version.

ScreenTips

- 1) Use ScreenTips to:
 - a) View the backstage
 - b) Change document views
 - c) **Help identify buttons (correct)**
 - d) Access frequently used commands

- 2) This image is a screen tip for ____?

- a) Modifying the ribbon options
- b) **Modifying the QAT (correct)**
- c) Modifying the paragraph option

Quick Access Toolbar

In the Microsoft Word window select the Quick Access Toolbar.

- 1) Open Quick Access Toolbar.docx
- 2) Select the Quick Access Toolbar
 - Quick Access Toolbar
- 3) Save to your course files

This feature is only available in the desktop version.

Ribbon

Alternate between Ribbon settings in the Microsoft Word window.

- 1) Open Ribbon.docx
- 2) Select the Ribbon
 - Ribbon
- 3) Auto-hide the Ribbon
 - Ribbon Display Options drop-down arrow > Auto-hide Ribbon

- 4) Set the Ribbon to only show tabs
 - Ribbon Display Options drop-down arrow > Show Tabs
- 5) Set the Ribbon to show tabs and commands
 - Ribbon Display Options drop-down arrow > Show Tabs and Commands
- 6) Save to your course files

Microsoft 365 (Web) and Online steps are indicated below.

- 1) Open Ribbon.docx
- 2) Select the Ribbon
 - Ribbon
- 3) Set the Ribbon to Show Tabs
 - Ribbon Display Options drop-down arrow > Show tabs only
- 4) Set the Ribbon to only show only when the cursor is moved over it
 - Ribbon Display Options drop-down arrow > Adjust automatically

Ribbon Tabs

Find elements related to the Ribbon tabs in the Microsoft Word window.

- 1) Open Ribbon Tabs.docx
- 2) Display the Insert tab
 - Insert tab
- 3) Select the Illustrations group
 - Illustrations group
- 4) Display the Design tab
 - Design tab
- 5) Select the Style gallery
 - Home tab > Styles group > Style gallery
- 6) Display the Home tab
 - Home tab
- 7) Display the Font Dialog Box Launcher
 - Home tab > Font group > Font dialog box launcher
- 8) Select the contextual tab
 - Header and Footer context tab
- 9) Save to your course files

Understand Ribbon Tabs

1) Match the words to their correct descriptions.

- a) Home
- b) Insert
- c) Draw
- d) Design
- e) Layout

The **Home (correct)** tab provides several frequently used editing features, such as copy and paste, text formatting with bold, various fonts, alignment, a style, etc.

The **Insert (correct)** tab allows the user to add extra elements to the document, such as tables, icons, shapes, pages, symbols, etc.

The **Draw (correct)** tab enables the user to use a pen tool.

The **Design (correct)** tab provides various formatting options for your document such as themes, effects, color schemes, paragraph spacing, etc.

The **Layout (correct)** tab allows the user to modify the document, including the page orientation, margins, page breaks, spacing, etc.

2) Match the words to their correct descriptions.

- a) References
- b) Mailings
- c) Help
- d) Review
- e) View

The **References (correct)** tab enables the user to enter document sources and citations, build a table of contents, add footnotes and endnotes, create an index, etc.

The **Mailings (correct)** tab, which is the least used, allows users to merge emails, write, insert, and merge different fields, etc.

The **View (correct)** tab enables users to check grammar, proofread, check accessibility, track changes, add or remove comments, etc.

The **View (correct)** tab allows users to shift between different views of the document, change page movement, switch windows and has the feature of the Immersive Reader.

The **Help (correct)** tab provides you with necessary features such as contacting Microsoft Support, providing feedback to Microsoft, viewing training videos and learning about new tools.

3) This ribbon is hidden by default and includes many tools that can help increase productivity when working with documents, such as macros, installing add-ins, using content controls to build online forms, protect against people making changes, or manage templates.

- a) Review tab
- b) View tab
- c) Mailing tab
- d) **Developer tab (correct)**

Unit 1 Commands and Features

Practice Exercise

Identify the correct Ribbon tab for each function listed.

- 1) Open U1 L1 Practice Exercise.docx
- 2) Locate the Ribbon tab that provides various formatting options for your document such as themes, effects, color schemes, and paragraph spacing
 - Design tab
- 3) Locate the Ribbon tab that enables users to check grammar, proofread, check accessibility, track changes, and add or remove comments
 - Review tab
- 4) Locate the Ribbon tab that provides several frequently used editing features such as copy/paste, text formatting with bold, various fonts, alignment, and styles
 - Home tab
- 5) Save to your course files

Unit 1 Commands and Features

Practice Questions

1) Which type of document can you create using Microsoft Word? (Choose all that apply)

- a) **Agendas (correct)**
- b) Budgets
- c) **Catalog (correct)**
- d) **Invoice (correct)**
- e) Slide show

2) Fill in the blanks with the correct words.

Choose commands that manage the document with the **File tab (correct)**, whereas commonly used commands can be found on the **Quick Access Toolbar (correct)**.

To activate the Zoom dialog box to enter a view percentage, select the **Zoom Level (correct)** option. To see the total number of pages in the document, use the **Status Bar (correct)** option.

- File tab
- Quick Access Toolbar
- Zoom Level
- Status Bar

3) Which view is available for all Office programs, giving you a central location to manage files?

- a) **Backstage (correct)**
- b) Outline
- c) Normal
- d) Draft
- e) Save As

4) ScreenTips always appear when you point at anything on the screen and always show a keyboard shortcut you can use.

- True
- **False (correct)**

5) Which buttons are seen on the Quick Access Toolbar by default? (Choose all that apply)

- a) **Save (correct)**
- b) **Redo (correct)**
- c) New
- d) Open

6) The Quick Access Toolbar can only be located at the top left of the application screen.

- True
- **False (correct)**

7) Match the correct term to the description.

- a) Active Ribbon tab
- b) Group
- c) Dialog box launcher

Active Ribbon tab (correct) Always displays with different background color or has an outline.

Group (correct) A set of related commands that perform similar tasks, such as cut, copy and paste.

Dialog box launcher (correct) Launches a dialog box or pane with more options for the group of commands.

8) Which of the following Ribbon tabs allows you to draw and create tables for small or large amounts of data?

- a) Draw
- b) Design
- c) **Insert (correct)**
- d) Layout

9) A Ribbon tab can be hidden by going into the Word options and in the Customize Ribbon option, turn off the checkbox for the Ribbon tab.

- **True (correct)**
- False

Unit 1 Create Project

The Create project is designed to allow the application and demonstration of new knowledge, skills, and personal creativity to produce a project-based result while integrating rubric requirements using a checklist.

Tip: While working on your project, remember to save your progress regularly. This will allow you to come back to it later. To continue working, open the document, then launch the platform using the Add-in whenever you're ready.

Begin your project by:

1. Create a new document using a brochure or flyer template
2. Save the document on your computer
3. If needed, open the document
4. Launch XED

Choose from one of the projects below:

- Create a Personal Biography: Use a Word template to write a short personal biography about yourself. Include your name, background, interests, and a fun fact about you.
- Design a Simple Event Flyer: Create a flyer for a school event, club meeting, or family gathering using a Word template. Add a title, date, time, location, and a short description of the event.
- Write a Short Letter: Create a short letter to a friend, family member, or fictional character. Use proper letter formatting, paragraph spacing, and an appropriate closing.
- Your Own Project Proposal: Propose a project idea of your choice to your instructor for approval. The goal is to develop a creative and feasible project idea that aligns with the course objectives and your interests.

Complete a document using the following as a guide/checklist.

- ☐ Use the gridlines and rulers to align images and text
- ☐ Use the Show/Hide to remove unneeded breaks
- ☐ Change the view of the document to ensure you have the desired design
- ☐ Update the document properties to include a document title and your name as the author
- ☐ Inspect the document to ensure there is no hidden text or comments
- ☐ Check the document's accessibility and resolve any issues
- ☐ Save the document as a PDF

Unit 1 Objective Assessment

- 1) You have been tasked with creating an article to be published in an online monthly newsletter. The article needs to have no more than 500 words and at least two photos. They have also asked if you can provide a ready-to-publish professional document. Which software program would you use to create this article?
 - a) **Microsoft Word (correct)**
 - b) Microsoft Publisher
 - c) Microsoft PowerPoint
 - d) Adobe InDesign

- 2) A friend has asked you to help them identify some basic terms on the Word Interface so they can understand the screen. Match the correct term to the description.
 - a) Quick Access Toolbar
 - b) Title Bar
 - c) Tell Me
 - d) Status Bar

Quick Access Toolbar (correct) Frequently used buttons on a toolbar
Title bar (correct) March Sales Figures report name
Tell me (correct) On screen help field
Status Bar (correct) Spelling error icon location

- 3) A simple purpose for Backstage is that options in this view are related to things you can do with the entire file itself.
 - **True (correct)**
 - False

- 4) To help a friend who is struggling with learning the new features of Word, which option would you direct them to read and reinforce skills on the screen?
 - a) **ScreenTips (correct)**
 - b) Tell Me
 - c) File tab
 - d) Status Bar

- 5) Word provides a number of tools you can use to complete tasks. Which of the following tools would you use for frequently used actions?
 - a) **Quick Access Toolbar (correct)**
 - b) Ribbon Tabs
 - c) File Tab
 - d) Tell Me

- 6) To demonstrate your understanding of how a Ribbon tab can be set up, review the following image and then match the number to the image with its description.

- a) Active Ribbon tab
- b) Active command
- c) Dialog box launcher button
- d) More button for a gallery
- e) Group of similar commands

1 (correct) Active Ribbon tab
2 (correct) Active command
3 (correct) Dialog box launcher button
4 (correct) More button for a gallery
5 (correct) Group of similar commands

- 7) One way to learn where commands can be found is to associate them with specific types of tasks. Review the following descriptions and then match the words to the Ribbon tab name that best suits the description.

- a) Home
- b) Insert
- c) Review
- d) References
- e) Layout
- f) Design

Home (correct) Commonly used commands such as copy and paste.
Insert (correct) Insert anything other than text.
Review (correct) Check and proof the document before distributing
References (correct) Insert research sources or links for a report.
Layout (correct) Set up options for how the page will appear.
Design (correct) Apply elements to change the page's overall appearance.

- 8) When you launch Word, the Backstage view appears. What can you do next? (Select all that apply)
- a) **Create a new blank file (correct)**
 - b) Open an existing file (correct)
 - c) Save an existing file
 - d) Save a new blank file
 - e) Print the new blank file

- 9) Many people use the PDF format to share files. Identify which of the following options are benefits of using the PDF format. (Select all that apply)
- a) **Maintains the design layout and format for distribution. (correct)**
 - b) **Restricts others from editing the file. (correct)**
 - c) **Makes the file smaller to use as a link for downloading. (correct)**
 - d) PDF files can be read in any program for easy reviewing.
 - e) PDF files are always saved as read-only.

10) You receive a PDF file of the inventory list at the warehouse. The inventory items appear to have been set up as columns. Why might you want to convert this file into a Word document versus an Excel spreadsheet file?

- a) **The PDF can be opened and converted directly within Word. (correct)**
- b) You need to convert the PDF file to a text file before you can open it in Excel.
- c) Word will automatically convert the file into a table format.
- d) Excel will convert the file into a database format.

11) Fill in the blanks with the correct words.

Word automatically assigns a **.docx (correct)** extension to the end of the file name. If you need the file to open in a previous version, you should save the file using **.doc (correct)** extension. The **.doc (correct)** extension can also be opened by other word processing programs without needing any formatting edits. The easiest file format to open in an application with the **.txt (correct)** extension but it does not include any formatting.

- .docx
- .doc
- .doc
- .txt

12) It is important to check for any accessibility issues before you share documents with others on a global basis. This is crucial when posting online documents with audio or visual elements. How does Alt text help with addressing the accessibility issues? (Select all that apply)

- a) **Alt Text provides a description for an object that cannot be identified with a text reader. (correct)**
- b) Alt Text checks to ensure the text is valid for any translation of the document text.
- c) Alt Text checks that a list of figures is available for all images or objects in the document.
- d) Alt Text is saved with an image file so this file can be used in any online document.

13) Knowing that objects in documents are compatible with higher versions of Word, why is it important you run the Compatibility Checker before sharing a Word 2019 document with a friend who has Word 2007 installed?

- a) **Some objects such as SmartArt diagrams are not compatible with previous versions of Word. (correct)**
- b) Running the Compatibility Checker tells you how much the file will be reduced in size to match Word 2007 requirements.
- c) Computing devices with Word 2007 generally do have enough RAM memory installed to show a document with lots of pictures.
- d) This is not a concern as newer versions of Windows address compatibility issues.

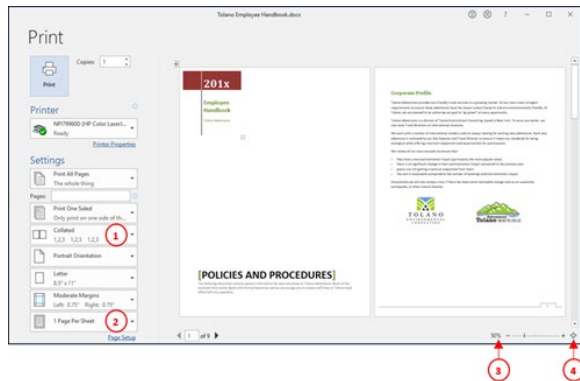

14) Fill in the blanks with the correct words.

When you save documents to a **cloud (correct)** location, you will see different **versions (correct)** of the file appear in a list.

This can be helpful if you **collaborate (correct)** with others on the same file and you want to **review (correct)** the changes made to the file yesterday.

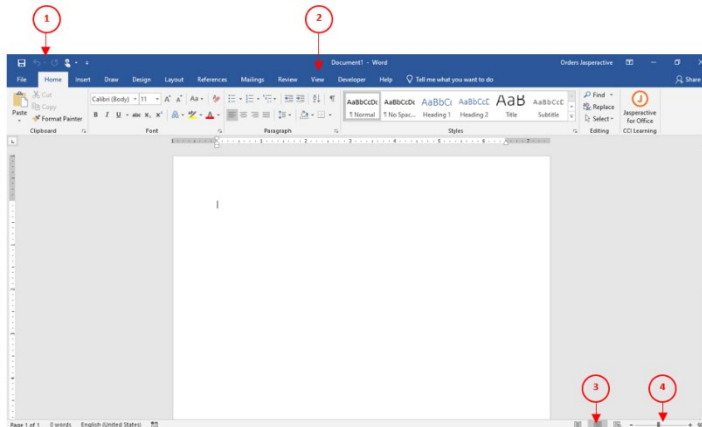

- collaborate
- versions
- cloud
- review

- 15) You can preview your document at any time to view how it will print. In this view, you can adjust the size of the page(s) in the document. Review the following image and then select the number for the feature that enables you to zoom into a single page.

- a) 1
 - b) 2
 - c) 3
 - d) **4 (correct)**
- 16) Just as you are ready to print the final version of the promotional sheet, a friend tells you some last minute changes are needed. This includes customizing the margins, changing the orientation, and possibly adding columns to the bottom portion of the document. Which option would you use to make these changes?
- a) Print parameters in the Preview view of Backstage
 - b) **Select Page Setup in the print parameters and made changes using the options in the Layout tab (correct)**
- 17) You have been working on an agenda for next month's staff meeting. Now that you are done, you need to share it with your friends. Which is the best method to share the file? (select all that apply)
- a) **Send the file via email to everyone. (correct)**
 - b) Save it to your OneDrive Personal location.
 - c) **Send an invite to your friends with a link to the online file (correct)**
 - d) Save the file to a central Teams location.
- 18) You are working on a project at home and currently do not have access to your files on the school network (Internet is active but the school network is down for maintenance). Which is the best option to send the work you've done on the project to your team members?
- a) **Send the file via email as an attachment. (correct)**
 - b) Save the file to USB that can be shared between your team members.
 - c) Go to the public library where you can send the file to the school network.
 - d) Ask the team to come to your home to get a printout.

- 19) There are a number of ways you can change the view of the document contents. Review the following image and select the number that identifies the View buttons.

- a) 1
b) 2
c) **3 (correct)**
d) 4
- 20) Knowing that you can change the view as required, review the following terms and descriptions and match the terms to correctly identify when you would use this view.
- a) Read Mode
b) Print Layout
c) Web Layout
d) Outline
e) Draft
- Read Mode (correct)** Read the document as if it were a book.
Print Layout (correct) Show all items in the document as if this were a printout.
Web Layout (correct) Show the page as if viewing it on a web browser.
Outline (correct) Create a table of contents to show the flow of the topics in the document.
Draft (correct) Focus on entering the text content in the document.
- 21) Depending on the document, you may need to zoom in or out of areas in a document to see more or less detail. Why would using the Zoom Level button to change the zoom be faster to return to 100%?
- a) **The Zoom dialog box appears where you can then 100% and then OK. (correct)**
b) This button automatically returns to 100% when selected.
c) You need only to double-click this button to return to 100%.
d) It automatically returns you to the last percentage used for the zoom.
- 22) Showing the formatting characters on the screen can be beneficial when editing the text. Review the following points and select those which could be included as a benefit. (select all that apply)
- a) **You can quickly delete extra tab characters that affect the alignment of text. (correct)**
b) **You can quickly identify if there are extra blank lines you don't need in the file. (correct)**
c) You can identify where the alignment of text was changed.
d) You can see if you need to add more spacing or images in the document.

- 23) You want to create a diagram that shows the process for a sales strategy and want to display gridlines to help align the text boxes. Which Ribbon tab will you find the Gridlines feature?
- a) **View (correct)**
 - b) Insert
 - c) Draw
 - d) Design
- 24) There are requirements you need to consider before sharing your files to an online storage location such as OneDrive. Review the following items and select the appropriate response for each of the items.
- a) **Have a Microsoft account. (correct)**
 - b) **Access to a valid OneDrive business or school location. (correct)**
 - c) **Invite others to view or edit the file. (correct)**
 - d) Must use Edge as the web browser.
 - e) File must be 100Kb in size or smaller.

A group of diverse students are seated at a long white table in a bright classroom, working on their laptops. The students are focused on their screens, with some looking at the camera and others looking down at their keyboards. The background shows large windows with a view of the outdoors.

Microsoft Word

Mw

Commands and Features

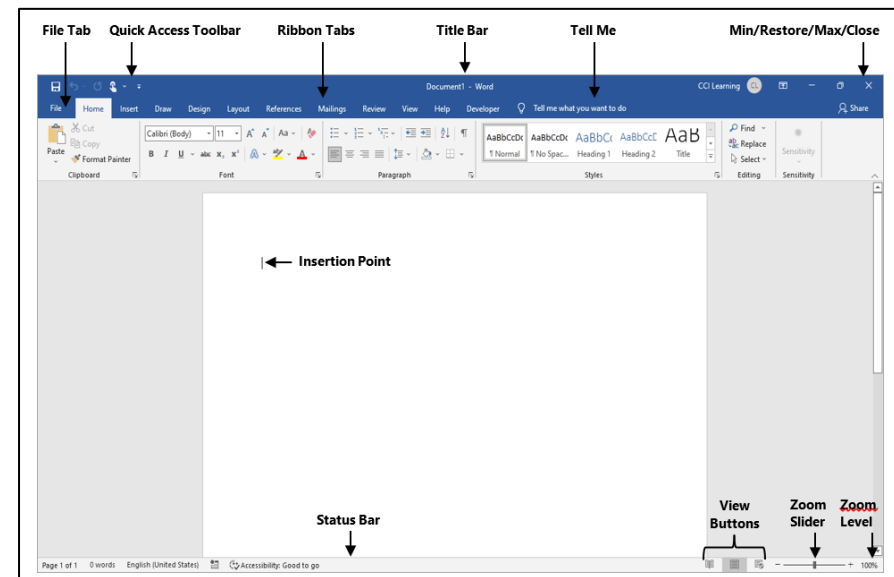

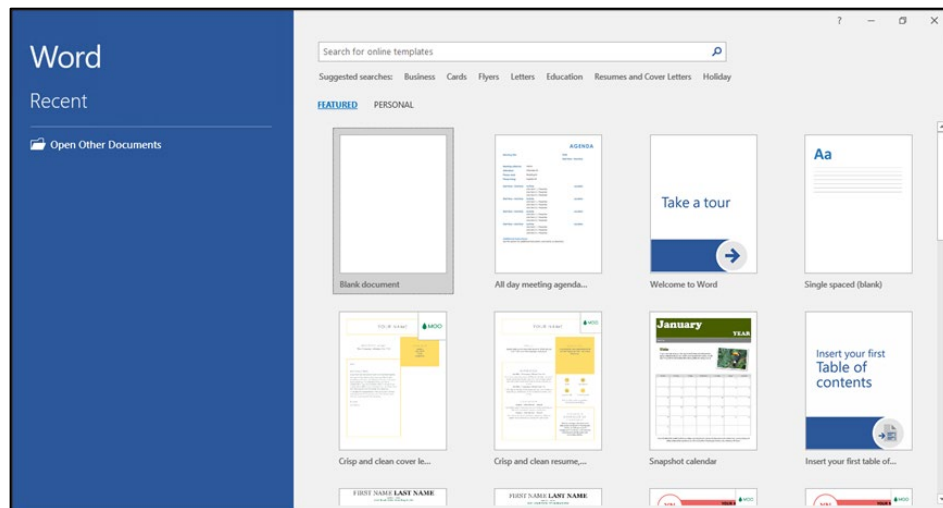

Unit 1: Getting Started

What is Microsoft Word?

- Word Processor
- Word enables you to
 - Create, modify or publish documents
 - Use styles or templates
 - Insert illustrations
 - Use formatting

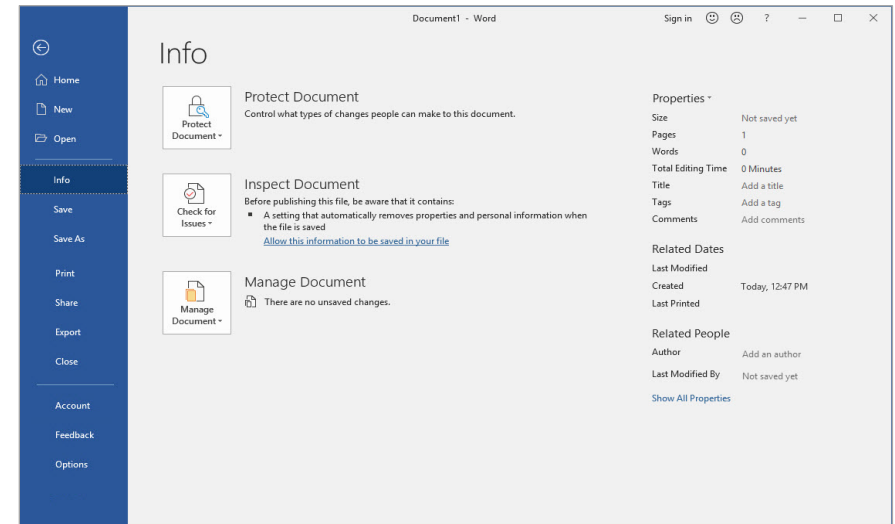

Microsoft Word Interface

From the Startup screen, select a new document from multiple options

Backstage

- Select File tab to display **Backstage** view
- Use Backstage view to create, open, save, print, and manage files
- Commands and options are related to the entire file

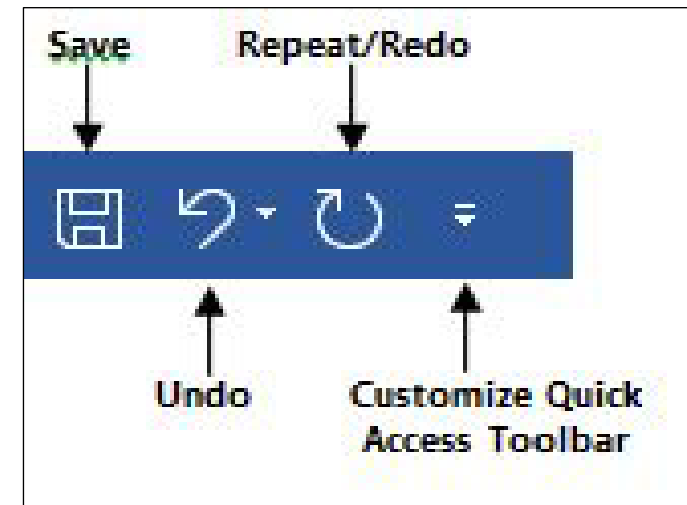

ScreenTips

- Helps identify buttons or elements
- A tip displays the name of the button and a description of its purpose

Quick Access Toolbar

- Contains frequently used commands
- Default settings
 - AutoSave indicator
 - Save
 - Undo
 - Repeat/Redo
 - Customize Quick Access Toolbar

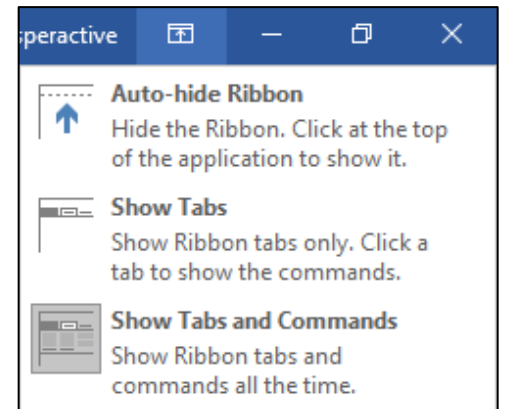

Ribbon

- Set of toolbars to find commands to complete a task

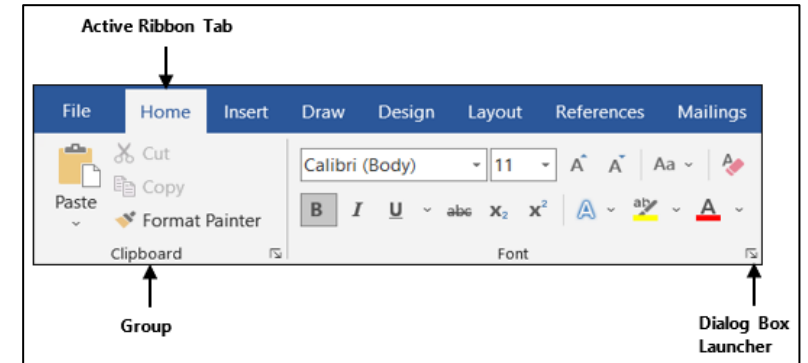

- Use  **Ribbon Display Options** icon to hide ribbon automatically, show tabs or show tabs and commands all the time

Ribbon Tabs

- Organize command buttons into logical groups that relate to a type of activity
- Commands separated in related groups
- Contextual tabs appear only when available

Understand Ribbon Tabs

Ribbon tabs include features to edit font, insert elements, draw with a pen, format themes and many more

Unit 1 Commands and Features Study Guide Complete

Topic	Explanation
What is Microsoft Word?	
What is Microsoft Word?	Word processing is a method of using a computer to create, edit and print documents such as letters, memos, newsletters, or reports.
Benefits of Word Processing	You can store the documents you create on your computer, giving you the option to edit or enhance portions of the entire document at any time.
Word's Features	<ul style="list-style-type: none"> • Use styles or templates. • A variety of illustration types. • A variety of formatting effects.
Word's Features	<ul style="list-style-type: none"> • Combine or merge information together. • Use tools to assist in creating documents for the Internet.
Launch Word in Windows	<ul style="list-style-type: none"> • Select the Word tile. • Choose All apps > Word.
Microsoft Word Interface	
File Tab	Select this tab to open the Backstage view to manage files.
Quick Access Toolbar	Gain quick access to frequently used commands.
Ribbon Tabs	Select a tab to access commands to complete a specific type of task.
Title Bar	Indicates which file and program is currently displayed in the window.
Tell Me	A Help option where you can enter keywords about a particular type of task and view information from the Word Help system on how to complete that task.
Minimize/Maximize/Restore Down/Close	Affect how much of the application window displays on the screen.
Insertion Point	The flashing bar on the screen that indicates your current position in the document. It is commonly referred to as the cursor.
Status Bar	Find information about the document currently displayed, such as which page you are viewing, the total number of pages, or whether an error condition exists.
View Buttons	Select to quickly change between the different document views available in the application.
Zoom Slider	Select the buttons to zoom in or out in increments of 10% or drag the slider button to a specific zoom percentage.
Zoom Level	Select this button to display a window for various percentages to zoom in or out of the document, including how to display multiple pages.
Backstage	
Backstage	This view is available for all the Office programs, setting a consistent look and location for users to use when they want to manage their files.

Use Backstage View	Use to create, open, save, print, and manage your files.
The Commands and Options	The commands and options available here are related to things you can do with the entire file itself.
In the Backstage You Can	Display information about the file, create a new file, open an existing file, assign a password, save a file with a different name, or print or share the file with others.
Tabs of the Backstage	These tabs are as follows: Home, New, Open, Info, Save, Save As, Print, Share, Export, Close, Account, Feedback, and Options.
ScreenTips	
ScreenTips	Identify buttons or elements on the tabs of the Ribbon and the screen.
To View a ScreenTip	Position the mouse pointer on the item.
Quick Access Toolbar	
Quick Access Toolbar	Left of the title bar above the Ribbon and contains buttons for frequently used commands.
Ribbon	
The Ribbon	Quickly find the commands that you need to complete a task.
Ribbon Display Options	<ul style="list-style-type: none"> • Show Tabs and Commands • Show Tabs • Auto-hide Ribbon
Ribbon Tabs	
Ribbon Tabs	Organizes command buttons into logical groups that relate to a type of activity, such as inserting objects, designing a page, or reviewing a document.
Groups	Each tab contains <i>Ribbon groups</i> with similar commands. For example, the Home tab has a group called Font that contains commands for formatting text characters.
Active Commands	A command that appears in a different background color or has an outline is active. Many of these de-activate when you select the button again or select another choice.
Dialog Box Launcher	A group could include a dialog box launcher which will open a dialog box containing additional tools and options for the Ribbon group.
Galleries	Galleries will include a scroll bar with a more option that you can select to display the full list or gallery for that option.
Contextual Tabs	Tabs appear only when they are applicable. For example, the Header & Footer Tools Ribbon tab appears only when you are working with headers and footers.
Understand Ribbon Tabs	
Home Tab	Several frequently used editing features, such as copy and paste, text formatting with bold, various fonts, alignment, a style etc.
Insert Tab	Insert or add extra elements to the document, such as tables, icons, shapes, pages, symbols, etc.
Draw Tab	Draw and erase using different colors and thicknesses with a pen tool or trackpad.

Design Tab	Various formatting options for your document such as themes, effects, color schemes, paragraph spacing etc.
Layout Tab	Modify the layout of the document, including the page orientation, margins, page breaks, spacing etc.
References Tab	Enter document sources and citations, build a table of contents, add footnotes and endnotes, create an index, etc.
Mailings Tab	Merge emails, write, insert, and merge different fields, etc.
Review Tab	Check grammar, proofread, check accessibility, track changes, add or remove comments, etc.
View Tab	Shift between different views of the document, change page movement, switch windows and has the feature of the Immersive Reader.
Help Tab	Contacting Microsoft Support, providing feedback to Microsoft, viewing training videos and learning about new tools.
Developer Tab	Macros, installing add-ins, using content controls to build online forms, protecting against people making changes, or managing templates. You may need to display this Ribbon as it is hidden by default.

Unit 1: Unplugged Activities

Instructor Guide

Instructions

Below are a variety of offline activities to choose from to support learning in the unit. Choose activities to enhance learning in the classroom.

Activity 1: Word Search

With Words - Use this word search to reinforce the key terms in the unit. An answer key is provided.

With Clues - Use this word search to challenge learners to find key terms in the unit using clues. An answer key is provided.

Activity 2: Crossword Puzzle

Solve the crossword puzzle by reading clues and filling in the answer with key terms from the unit. A solution key is provided.

Activity 3: Multiple Choice Speed Game

This game can be played as a class or small groups. This is a timed game where learners have 15 seconds to choose the correct answer. Learners receive one point for each answer they get correct and total the amount at the end to see who has the most points. Alternatively, you can have no points system. There are many options to adapt this game to your individual class.

Activity 4: Label Diagram

Print the Word image and have learners label the various features. This can be done as a class, small groups, pairs or individually. You can also make this a timed activity or a competition between teams for more interactive experience. An answer key is provided.

Activity 5: Template Project

Learners will have learned about the many Word Template options provided to users. Using this as inspiration for their project, learners will create a handmade template such as a recipe card, song, poem, invitation, newsletter etc. Encourage learners to think outside the box and not just copy a version from Word. Rubric included.

Unit 1: Unplugged Activity

Activity 1: Word Search

With Words - Use this word search to reinforce the key terms in the unit. An answer key is provided.

With Clues – Use this word search to challenge learners to find key terms in the unit using clues. An answer key is provided.

Unit 1 Word Search with Words

Complete the following word search by finding and circling all the words in the box below the puzzle. Words can be in any direction.

Unit 1 Word Search with Clues

Complete the following word search by finding and circling the words that fit the clues below. Words can be in any direction.

Unit 1 Word Search Clues

	CLUE
	A collection of tabs located directly below the title bar, which provides quick access to commands required to complete a task.
	A feature in which a small pop-up window appears when a mouse pointer hovers over an icon or button.
	A feature that enables you to enlarge or decrease your view of the document.
	A feature that enables you to locate specified text within a document.
	A feature that is helpful to align items on the page such as images or shapes.
	A feature that specifies how multiple copies of the document will be printed.
	A feature you can use to check a document for items you may not want others to view if you share the document, such as personal information.
	A feature you can use to ensure that a document can be accessed globally on various devices for users with accessibility issues, such as visual or audio impairment.
	A feature you can use to ensure that a document can be opened in older versions of Word or in a different format that may be required for another program.
	A file format used to maintain the design layout and format of a file for distribution to others, restrict the editing of file contents, or to make a file smaller so it can be set up as a link on a website for downloading.
	A hidden tab or menu that appears when objects, such as text, images, or other elements are selected.
	An option where you can enter keywords about a particular type of task and view information on how to complete that task.
	Appropriate for most typing, editing, and formatting tasks.
	Different ways of being able to observe the document to assist in working with the text, page layout, web layout, an outline, or reading.
	May be up to four characters and describes the type of file (.docx for Word documents).
	Pre-designed and customized blocks of text or elements inserted into a document such as text, logos, tables, or images.
	Pre-designed document that can be used to create a specific type of document.
	Select how many pages of the document will print on a sheet of paper.
	The button at the lower right of a Ribbon group that displays a box or pane with more options for specific features.
	The command used to save an existing document with a new name or to a different location.
	The direction of the paper for text flow.
	The flashing bar on the screen that indicates your current position in the document.
	The page orientation that uses the length of the paper horizontally.
	The page orientation that uses the length of the paper vertically.
	The standard way that information is encoded in an electronic file and is indicated by the file name extension.
	The view that appears when you select the File tab.
	This tab draws a vertical line in each line of text at the tab stop.
	This tab enables the user to enter document sources and citations, create a table of contents, add an index, etc.
	This tab enables the user to format themes, backgrounds, color schemes, page borders, etc.
	This toolbar contains popular commands such as Save, Undo, and Redo.
	When active, a pane appears on the screen to help you search for text and displays the results by headings, pages, or a list of the results in the document.

Word Search with Clues Answer Key

ANSWER KEY	CLUE
RIBBON	A collection of tabs located directly below the title bar, which provides quick access to commands required to complete a task.
SCREENTIPS	A feature in which a small pop-up window appears when a mouse pointer hovers over an icon or button.
ZOOM	A feature that enables you to enlarge or decrease your view of the document.
FIND	A feature that enables you to locate specified text within a document.
GRIDLINE	A feature that is helpful to align items on the page such as images or shapes.
COLLATED	A feature that specifies how multiple copies of the document will be printed.
INSPECTOR	A feature you can use to check a document for items you may not want others to view if you share the document, such as personal information.
ACCESSIBILITY CHECKER	A feature you can use to ensure that a document can be accessed globally on various devices for users with accessibility issues, such as visual or audio impairment.
COMPATIBILITY CHECKER	A feature you can use to ensure that a document can be opened in older versions of Word or in a different format that may be required for another program.
PDF	A file format used to maintain the design layout and format of a file for distribution to others, restrict the editing of file contents, or to make a file smaller so it can be set up as a link on a website for downloading.
CONTEXTUAL	A hidden tab or menu that appears when objects, such as text, images, or other elements are selected.
TELLME	An option where you can enter keywords about a particular type of task and view information on how to complete that task.
DRAFT	Appropriate for most typing, editing, and formatting tasks.
VIEW OPTIONS	Different ways of being able to observe the document to assist in working with the text, page layout, web layout, an outline, or reading.
EXTENSION	May be up to four characters and describes the type of file (.docx for Word documents).
BUILDING BLOCKS	Pre-designed and customized blocks of text or elements inserted into a document such as text, logos, tables, or images.
TEMPLATE	Pre-designed document that can be used to create a specific type of document.
SCALING	Select how many pages of the document will print on a sheet of paper.
DIALOGBOX	The button at the lower right of a Ribbon group that displays a box or pane with more options for specific features.
SAVEAS	The command used to save an existing document with a new name or to a different location.
PAGE ORIENTATION	The direction of the paper for text flow.
INSERTION POINT	The flashing bar on the screen that indicates your current position in the document.
LANDSCAPE	The page orientation that uses the length of the paper horizontally.
PORTRAIT	The page orientation that uses the length of the paper vertically.
FILE FORMATS	The standard way that information is encoded in an electronic file and is indicated by the file name extension.
BACKSTAGE	The view that appears when you select the File tab.
BAR	This tab draws a vertical line in each line of text at the tab stop.
REFERENCE	This tab enables the user to enter document sources and citations, create a table of contents, add an index, etc.
DESIGN	This tab enables the user to format themes, backgrounds, color schemes, page borders, etc.
QUICK ACCESS	This toolbar contains popular commands such as Save, Undo, and Redo.
NAVIGATION	When active, a pane appears on the screen to help you search for text and displays the results by headings, pages, or a list of the results in the document.

Unit 1 Crossword Puzzle Answer Key

Unit 1: Unplugged Activity

Activity 3: Multiple Choice Speed Game

This game can be played as a class or small groups. This is a timed game where learners have 15 seconds to choose the correct answer. Learners receive one point for each answer they get correct. Total the amount at the end of the game to see who has the most points. Alternatively, you can have a no points system. There are many options to adapt this game to your individual class. A timing device will be needed.

Instructor Led Option

- Display one at a time the definitions/questions and multiple-choice answers to the class using a smartboard or projector.
- Learners can answer the multiple-choice answer (A, B, C, D), by writing on a personal dry erase board, calling out the answer or any other method of your choice.
- Reveal the correct answer after 15 seconds.

Learner Led Option

- Print off definitions/questions and multiple-choice answers. Fold in half if you prefer.
- Place learners into small groups, assign one learner to be the game host and read the definitions and answers.
- The remaining learners play the game.
- Learners can answer the multiple-choice answer (A, B, C, D), by writing on a personal dry erase board, calling out the answer or any other method of your choice.
- The game host reveals the correct answer after 15 seconds.

Unit 1 Multiple Choice Speed Game

Multiple Choice	Definition/Question
A) Accessibility Checker B) Compatibility Checker C) Compatible Checker D) Accessible Checker	A feature you can use to ensure that a document can be accessed globally on various devices for users with accessibility issues, such as visual or audio impairment.
A) Portrait B) Backstage C) Landscape D) Frontstage	The view that appears when you select the File tab. It provides commands that deal with the entire file.
A) Design B) Custom C) Building D) Text	Pre-designed and customized blocks of text or elements inserted into a document such as text, logos, tables, or images.
A) Compatibility Checker B) Accessibility Checker C) Format Checker D) Document Checker	A feature you can use to ensure that a document can be opened in older versions of Word or in a different format that may be required for another program.
A) Menu Tabs B) Contextual Tabs C) Image Tabs D) Document Tabs	A hidden tab or menu that appears when objects, such as text, images, or other elements are selected.
A) Toolbar Launcher B) Pane Button C) Dialog Box Launcher D) References Button	The button at the lower right of a Ribbon group that displays a box or pane with more options for specific features.
A) Document Properties B) Privacy Properties C) Privacy Inspector	A feature you can use to check a document for items you may not want others to view if you share the document, such as personal information.

D) Document Inspector	
A) .xlsx B) .rtf C) .docx D) .pub	Which of the following is not a file extension used for Word documents?
A) Portable Document Format B) File Format C) Plain Text Format D) Word Format	The standard way that information is encoded in an electronic file and is indicated by the file name extension.
A) Help B) Home C) Find D) View	A feature that enables you to find specified text within a document.
A) Search B) Display C) Review D) Navigation	When active, a pane appears on the screen to help you search for text and displays the results by headings, pages, or a list of the results in the document.
A) Page Orientation B) Portrait Orientation C) Landscape Orientation D) Collated Orientation	The direction of the paper for text flow.
A) .pub B) .pdf C) .txt D) .rtf	A file format used to maintain the design layout and format of a file for distribution to others, restrict the editing of file contents, or to make a file smaller so it can be set up as a link on a website for downloading.
A) Ribbon B) Title C) Quick Access D) Status	This toolbar contains popular commands such as Save, Undo, and Redo and can be customized for those commands you use frequently.

A) Developer B) Layout C) Reference D) Ribbon	A collection of tabs located directly below the title bar, which provides quick access to commands required to complete a task.
A) Design B) Draw C) Layout D) Review	This tab enables the user to format themes, backgrounds, color schemes, page borders, etc. in a document.
A) Developer B) References C) Layout D) Review	This tab enables the user to enter document sources and citations, create a table of contents, add an index, etc.
A) What's New B) Search C) Tell Me D) Toolbar	An option where you can enter keywords about a particular type of task and view information on how to complete that task.
A) Store B) Save C) Save As D) Store	The command used to save an existing document with a new name or to a different location.
A) Template B) Icon C) Gridline D) ScreenTip	A feature in which a small pop-up window appears when a mouse pointer hovers over an icon or button.
A) Document B) Template C) Table D) Title Bar	Pre-designed document that can be used to create a specific type of document.

A) Review B) View C) Layout D) References	This tab enables users to proofread, add or remove comments, track changes, Read Aloud, check accessibility, etc.
A) Zoom B) Maximize C) Minimize D) Slider	A feature that enables you to enlarge or decrease your view of the document.
A) Outline B) Draft C) Print Layout D) Read Mode	Appropriate for most typing, editing, and formatting tasks.
A) Center B) Bar C) Decimal D) Left	This tab draws a vertical line in each line of text at the tab stop.
A) Print B) Collated C) Scaling D) Page Setup	This feature determines how many pages of the document will print on a sheet of paper.
A) Gridline B) Navigation C) Ruler D) Toolbar	This feature is helpful when you want to align items on the page such as images or shapes.
A) CTRL+DOWN B) CTRL+PGDN C) CTRL+END D) CTRL+RIGHT	The keyboard shortcut to move to the next page in a document.
A) Print B) Collated	This feature specifies how multiple copies of the document will be printed.

C) Scaling	
D) Page Setup

A) CTRL+DOWN B) CTRL+PGDN C) CTRL+END D) CTRL+RIGHT	The keyboard shortcut to move to the next page in a document.
A) Print B) Collated	This feature specifies how multiple copies of the document will be printed.

C) Scaling	
D) Page Setup	

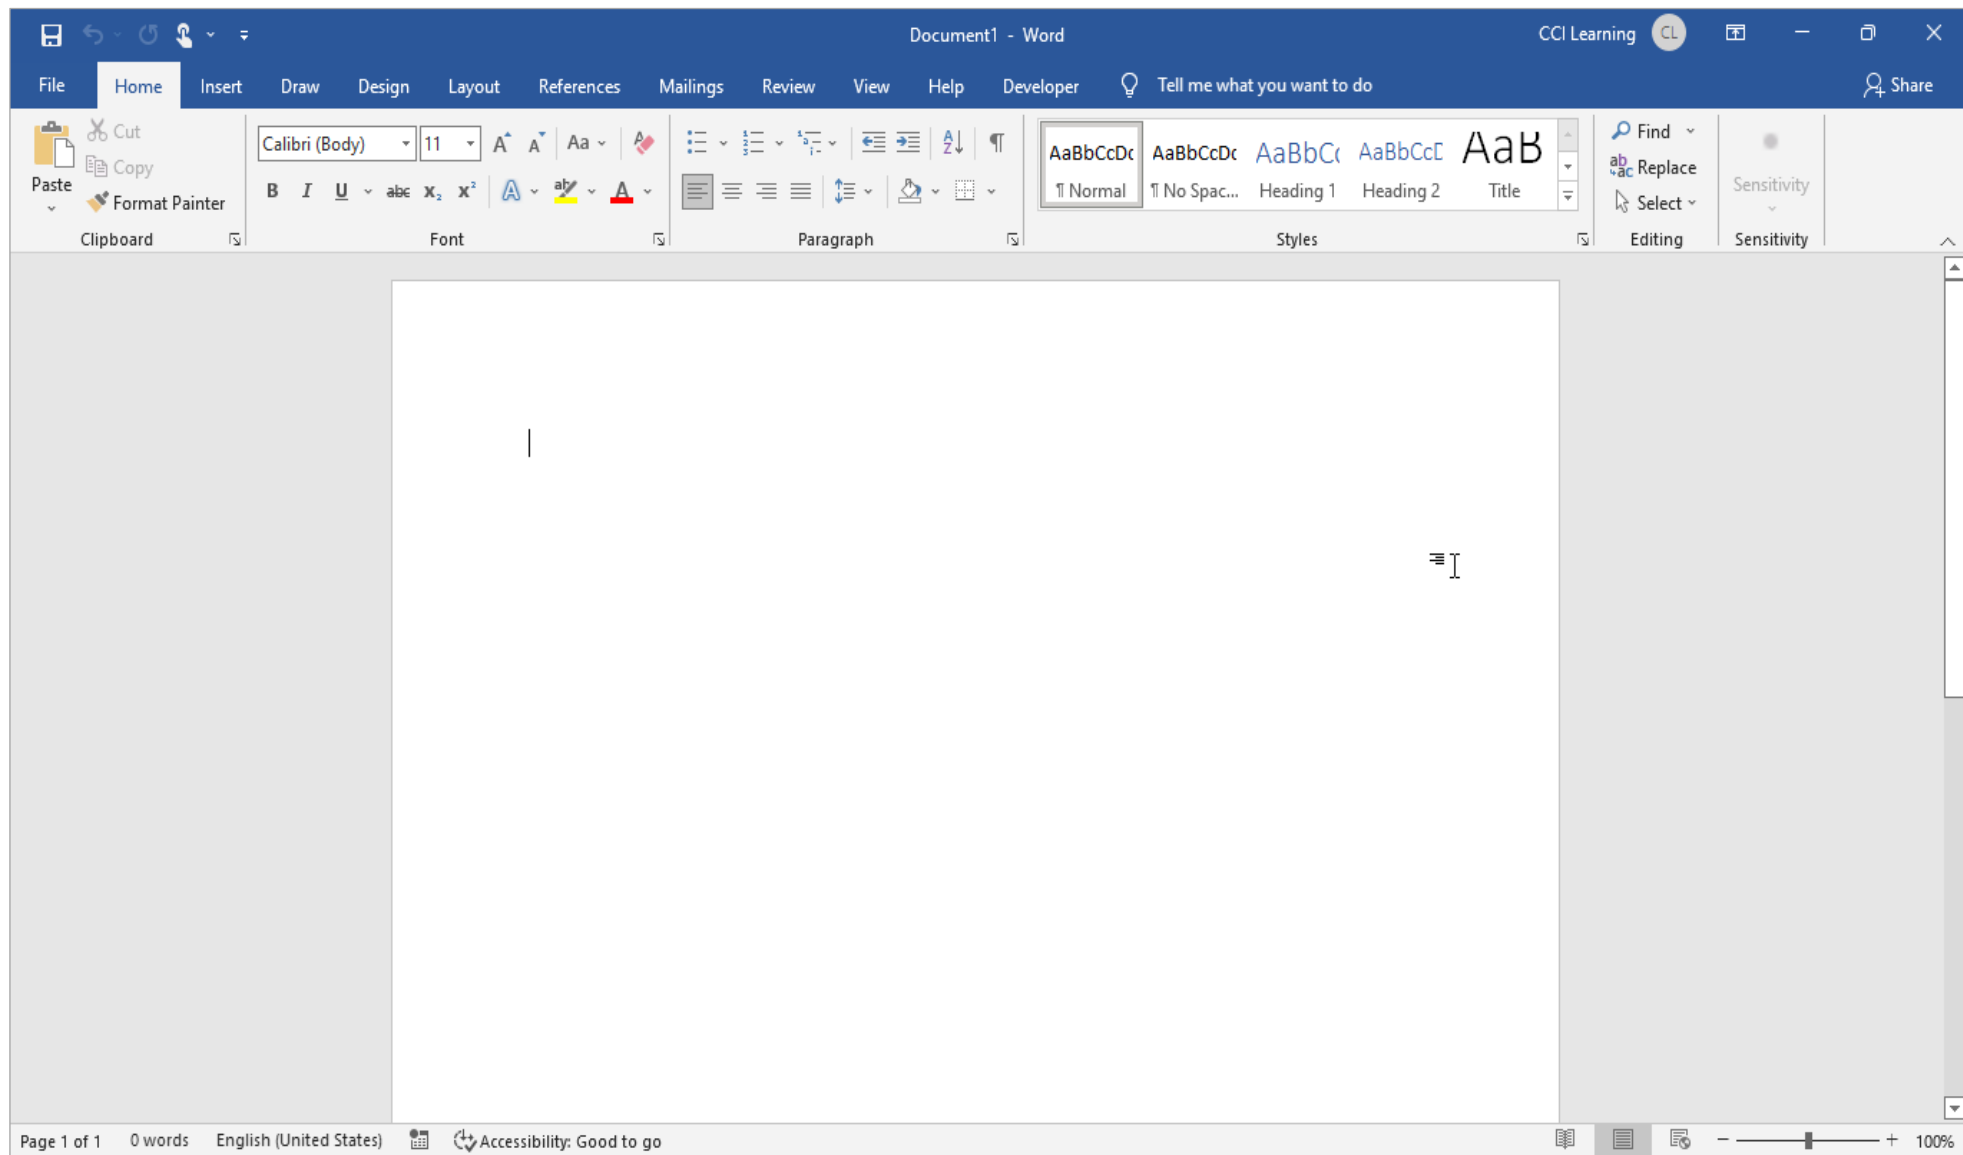

Unit 1: Unplugged Activity

Activity 4: Label Diagram

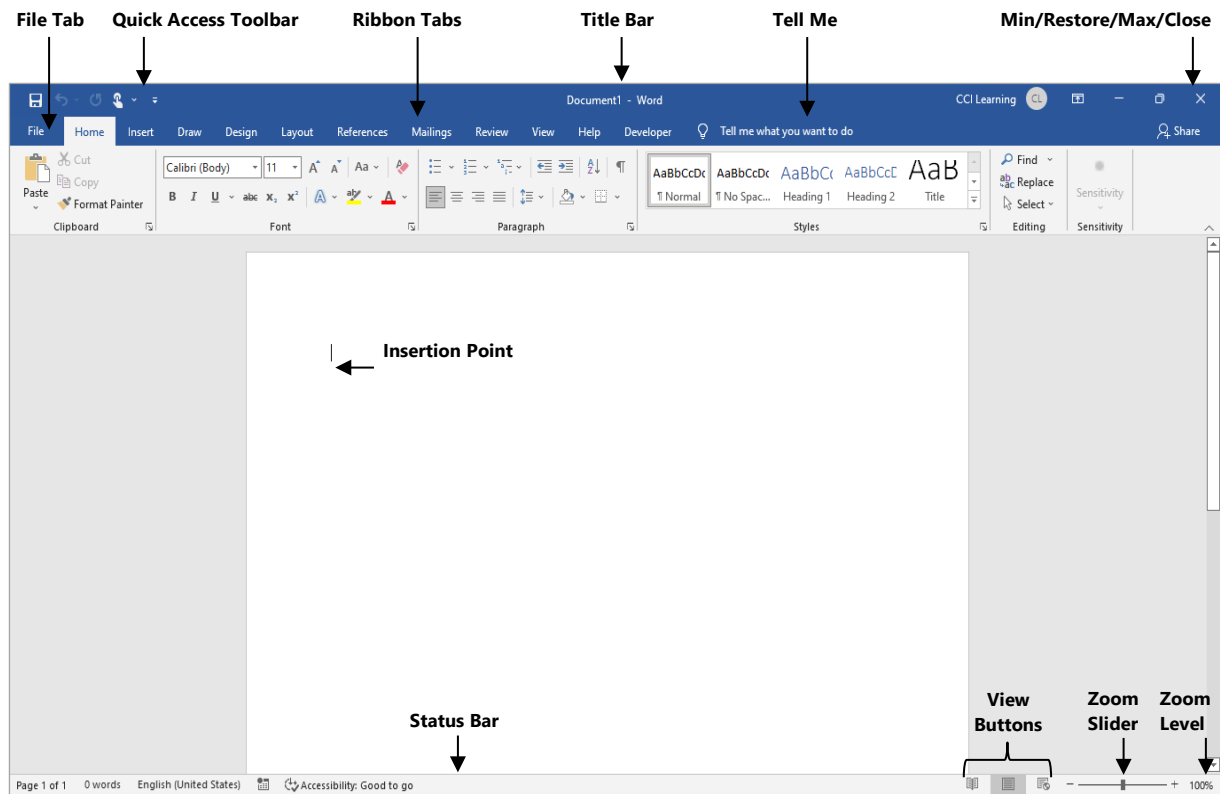

Print the Word image and have learners label the various features. This can be done as a class, small groups, pairs or individually. You can also make this a timed activity or a competition between teams for a more interactive experience. An answer key is provided.

Use the following cards to label the diagram. You can print, cut and label the diagram.

File Tab ↓	Minimize/Maximize/ Restore Down/Close ↓
Quick Access Toolbar ↓	Insertion Point ↓
Ribbon Tabs ↓	Status Bar ↓
Title Bar ↓	View Buttons ↓
Tell Me ↓	Zoom Slider ↓
	Zoom Level ↓

Unit 1 Label Diagram Answer Key

Unit 1: Unplugged Activity

Activity 5: Template Project

Learners will have learned about the many Word Template options provided to users. Using this as inspiration for their project, learners will create a handmade “template” such as a recipe card, song, poem, invitation, newsletter etc. Encourage learners to think outside the box, be unique and not just copy a version from Word. This is a one-page submission. Learners should show their learning of Word by using different colors, fonts, images etc. for their project.

If you choose to grade this activity, the following rubric can be used as guide.

Criteria	Excellent	Good	Satisfactory	Needs Improvement
	4	3	2	1
Creativity	Design is unique, detailed, and interesting.	Design is generally unique, detailed, and interesting.	Design is somewhat unique, detailed, and interesting.	Design lacks being unique, detailed, or interesting.
Use of Word Template Features	Excellent understanding and use of Word Template features.	Good understanding and use of Word Template features.	Satisfactory understanding and use of Word Template features.	Minimal understanding and use of Word Template features.
Understanding of Project	Excellent understanding of project requirements. Activity followed and work well completed.	Good understanding of project requirements. Activity followed and work mostly completed.	Satisfactory understanding of project requirements. Activity followed and work somewhat completed.	Lack of understanding of project requirements. Activity not followed or completed.
Effort & Production	Work shows excellent effort, planning. Used class time to the maximum.	Work shows good effort and planning. Used class time for work but was sometimes off task.	Work shows satisfactory effort and planning. Class time not used as efficiently as it could be.	Work shows minimal effort and planning. Class time not used effectively.

Word Unit 1 Key Terms

Term	Definition
.docx	The file type associated with Microsoft Word 2007 and later and is automatically assigned to the end of a file name.
Accessibility Checker	A feature you can use to ensure that a document can be accessed globally on various devices for users with accessibility issues, such as visual or audio impairment.
Backstage	The view that appears when you select the File tab. It provides commands that deal with the entire file.
Compatibility Checker	A feature you can use to ensure that a document can be opened in older versions of Word or in a different format that may be required for another program.
Contextual Tabs	A hidden tab or menu that appears when objects, such as text, images, or other elements are selected.
Dialog Box Launcher	The button at the lower right of a Ribbon group that displays a dialog box or pane with more options for specific features.
Document Inspector	A feature you can use to check a document for items you may not want others to view if you share the document, such as personal information.
File Formats	The standard way that information is encoded in an electronic file. The file format is indicated by the file name extension.
Go To Feature	A quick method of jumping to a specific page.
Gridlines	A feature to help align items on a page such as images and shapes.
Navigation Pane	When active, a pane appears on the screen to help you search for text and displays the results by headings, pages, or a list of the results in the document.
Page Orientation	The direction of the paper for text flow. Portrait uses the length of the paper vertically. Landscape uses the length of the paper horizontally.
PDF	A file format used to maintain the design layout and format of a file for distribution to others, restrict the editing of file contents, or to make a file smaller so it can be set up as a link on a website for downloading.
Quick Access Toolbar	Contains popular commands such as Save, Undo, and Redo. This toolbar can be customized for those commands you use frequently.
Ribbon	A collection of tabs located directly below the title bar, which provides quick access to commands required to complete a task.
Ribbon Groups	The groupings on each ribbon tab containing commands for specific tasks.
Ribbon Tabs	A collection of command buttons organized into logical groups that relate to a type of activity.
Save	The command used to store a document.
Save As	The command used to save an existing document with a new name or to a different location.
ScreenTip	A feature in which a small pop-up window appears when a mouse pointer hovers over an icon or button. The pop-up window will provide details that explain the icon's or button's function.

Template	Pre-designed document that can be used to create a specific type of document. Setting up a template enables documents to have a consistent look.
View Options	Different ways of being able to view the document, usually to assist in working with the text, page layout, web layout, an outline, or reading.
Zoom	A feature that enables you to enlarge or decrease your view of the document.

Word Course Key Terms

Term	Definition
.docx	The file type associated with Microsoft Word 2007 and later and is automatically assigned to the end of a file name.
3D Models	Insert a 3D Model object from an online source to add a multidimensional element; you can modify its appearance and position in the document.
Accessibility Checker	A feature you can use to ensure that a document can be accessed globally on various devices for users with accessibility issues, such as visual or audio impairment.
Alternative Text	Commonly referred to as Alt Text, this is descriptive text added to graphic objects which can be read aloud by screen readers or other text-to-speech tools.
Artistic Effect	Apply an effect that gives the picture an artistic appearance such as looking at a picture with a block glass effect.
AutoCorrect	Automatic corrections for spelling errors, incorrect capitalization, and some identified shortcuts. Word automatically corrects small typos or mistakes as text is being entered.
Backstage	The view that appears when you select the File tab. It provides commands that deal with the entire file.
Bookmark	Assigns a name to the item or location in the document.
Bulleted List	A designated list that uses symbols such as bullets to indicate there is no priority set for the list items. The bullet character can be customized, as required.
Character Formatting	The special stylized variations applied to plain characters to make them stand out from other text. They include bold, italics, underline, and color.
Charts	A type of diagram that can display trends or patterns in a series of data.
Clipboard	A feature to temporarily store any cut or copied items such as text or graphics.
Color Options	Adjust the intensity or saturation of the color in the image.
Columns	A feature to format document text into "newspaper style".
Combine Documents	Combine revisions from multiple authors into a single document. To combine multiple documents, combine two documents together first and then combine another document with the new merged document.
Comments	Appear in the Markup area at the right of the document and are used to provide specific instructions, describe decisions that were made, seek clarification, ask a question or specify any content that needs to be revised or reformatted.
Compare Documents	Compares two versions of a document and displays only what changed between them. This helps to quickly identify the differences. The documents that are being compared are not changed.
Compatibility Checker	A feature you can use to ensure that a document can be opened in older versions of Word or in a different format that may be required for another program.

Compress Pictures	Reduce the size of the picture by changing its resolution or clarity.
Contextual Tabs	A hidden tab or menu that appears when objects, such as text, images, or other elements are selected.
Convert a Table	Convert a table to a tabbed report.
Convert Text to a Table	Convert selected text to a table format.
Copy	An editing function used to duplicate designated text, objects or files using the Clipboard.
Correction Options	Change or correct the brightness or contrast of a picture and sharpen or soften the picture to adjust its clarity.
Cover Page	Introduces the document with a proper title, a potential image, and provides a brief overview of the information that will be in the document.
Crop Objects	Cut or remove portions of an object, either from the horizontal, vertical, or fit to a shape.
Cross-Reference	Links to other parts of the same document. For example, a cross-reference is created to link to a chart or graphic that appears elsewhere in the document. The cross-reference appears as a link that takes the reader to the referenced item.
Cut	An editing function used to move designated text, objects, or files to the Clipboard.
Dialog Box Launcher	The button at the lower right of a Ribbon group that displays a dialog box or pane with more options for specific features.
Document Inspector	A feature you can use to check a document for items you may not want others to view if you share the document, such as personal information.
Drawing Canvas	An enclosed area that keeps shapes together within that space.
Effects	Stylizations you can add to text. Strikethrough, superscript/subscript, shadow, and small caps are examples of text effects.
Endnotes	Commonly used to reference a selected item in the document, and generally include information about the author or originator of the item. Endnotes appear at the end of the document or document section.
File Formats	The standard way that information is encoded in an electronic file. The file format is indicated by the file name extension.
Font	Describes the typeface or appearance of characters.
Font Styles	The typeface variation including normal, bold, italic, bold italic.
Footers	Text or graphics that appear at the bottom of a page. Usually contain simple information such as the document title, page number, or author's name; or it can contain sophisticated graphics (such as a company logo or product design).
Footnotes	Commonly used to reference a selected item in the document, and generally include information about the author or originator of the item. Footnotes usually appear at the bottom of the page but may also be placed directly below the text. Each footnote has a numbered note reference mark, which usually restarts on each page.

Format Painter	The feature that enables you to copy or paint formatting attributes from one selection of text to another selection or selections of text.
Formulas	A calculation set up in a table using basic mathematical operands.
Go To Feature	A quick method of jumping to a specific page.
Gridlines	A feature to help align items on a page such as images and shapes.
Group Objects	Group multiple objects together so the object is treated as one object. Any effects applied to the group affect everything in that group.
Gutter	The amount of white space added to the top or side margin if the document is to be bound.
Header Rows	The first row of a table that repeats at the top of the table on every page where data for the table displays.
Headers	Text or graphics that appear at the top of a page. Usually contain simple information such as the document title, page number, or author's name; or it can contain sophisticated graphics (such as a company logo or product design).
Icons	Scalable vector graphics that visually represent ideas, objects, or actions.
Insert Online Pictures	Insert a picture from an online location using the Bing search engine which includes pictures designed for use as Creative Commons.
Insert Picture from File	Insert a picture from a location you can access on your computer, such as the local drive, a USB drive, or a network/cloud drive.
Layer Objects	Arrange objects to create a layer effect.
Leader	A Tab option gives the audience a visual guide when reading across the page.
Line Spacing	The amount of white space between lines of entered text, measured from the baseline of one line of text to the baseline of the next line of text.
Links	Give readers instant access to information on a Web Page, in another part of the same document, to an existing document, a new document or to an E-mail Address. The hyperlink can be text or graphics.
List Style	Styles that are set up to be applied to list items that include indent positions for the list items. These styles can be customized.
Margin	The amount of space between the edge of the paper and the printed text area.
Mini Toolbar	A small toolbar that appears and contains the most used features from the Font and Paragraph groups.
Multilevel List	A designated list that displays various levels of items using bullets, numbers, or a combination.
Navigation Pane	When active, a pane appears on the screen to help you search for text and displays the results by headings, pages, or a list of the results in the document.
Numbered List	A designated list that uses numbers to indicate a priority for items. This type of list can be customized to use roman numerals or alpha characters instead of numbers.
Orientation	The printed text layout.
Page Break	Ends the page wherever you want by inserting the break.
Page Numbers	Keep track of the number of pages in a document and are inserted into a header or footer.

Page Orientation	The direction of the paper for text flow. Portrait uses the length of the paper vertically. Landscape uses the length of the paper horizontally.
Paste	The editing function of placing cut or copied data into a new location.
PDF	A file format used to maintain the design layout and format of a file for distribution to others, restrict the editing of file contents, or to make a file smaller so it can be set up as a link on a website for downloading.
Picture Effects	Apply effects to the picture such as a glow or shadow.
Picture Styles	Pre-designed effects that can create a specific mood for the document message.
Position Objects	Drag the object to another location in the document or set precise measurements for where the object should appear in the document.
Proofing Pane	Displays detected errors in the context of the sentence in which it appears. The type of error (spelling or grammar) is listed at the top of the pane, and a brief description of why the detected instance was flagged as an error also appears.
Quick Access Toolbar	Contains popular commands such as Save, Undo, and Redo. This toolbar can be customized for those commands you use frequently.
Redo	A feature that allows you to redo an action.
Resize Objects	Drag one of the handles around the object to resize the object; or enter specific measurements for a precise size for the object.
Reviewing Pane	Used to view all the tracked changes in one location, enabling editors to scroll through the pane to review changes or to get an idea of how many changes were made to the document.
Ribbon	A collection of tabs located directly below the title bar, which provides quick access to commands required to complete a task.
Ribbon Groups	The groupings on each ribbon tab containing commands for specific tasks.
Ribbon Tabs	A collection of command buttons organized into logical groups that relate to a type of activity.
Rotate Objects	Rotate the object by a specific angle or drag the rotation handle to an angle of your choice.
Rows	A horizontal bar that includes information related to the items in the table.
Save	The command used to store a document.
Save As	The command used to save an existing document with a new name or to a different location.
Screen Clipping	Take a capture of a selected portion of the open application window.
Screenshot	Take a capture of the entire open application window.
ScreenTip	A feature in which a small pop-up window appears when a mouse pointer hovers over an icon or button. The pop-up window will provide details that explain the icon's or button's function.
Section Break	Separates a document into sections to which specific formatting can be applied.
Select	A feature that enables you to highlight data for a future action such as deleting, copying, formatting, converting to a table, etc.
Shapes	Draw a variety of shapes that can be modified with fills, colors, or effects.

SmartArt	Create and modify specific types of diagrams such as organization charts, a matrix, or list processes.
SmartArt Text Pane	Activate this pane in the SmartArt diagram to edit text.
Sort Data	Sort data in alphabetical or numerical order.
Spelling and Grammar	The spelling portion of the feature checks for incorrect spelling, duplicate words, and incorrect capitalization. The grammar portion of the feature detects sentences with grammatical errors or weak writing style, based on standards set in the options selected for checking spelling and grammar.
Split Table	Used to split a table at a specific location.
Style	A combination of character and paragraph formatting that you save with a unique style name.
Symbols	Characters that can be inserted into a document, either as a text character or for a bullet or numbering style.
Tab Stops	Used to align text at specific points in the document.
Table of Contents	A list of headings for all sections in a document, organized in the order in which the section appears in the document, complete with the corresponding page numbers and selected formatting.
Table Styles	Styles set up with formatting options for a table.
Tables	A grid that combines columns and rows for quick alignment and display of a large amount of data, such as a revenue report, stock price, inventory items, etc.
Template	Pre-designed document that can be used to create a specific type of document. Setting up a template enables documents to have a consistent look.
Text Box	Insert a pre-designed text box or draw a text box; used to enter text into directly and to emphasize specific areas of a document.
Text Size	The height of the characters. As characters get taller, they grow proportionally wider.
Text Wrapping	Choose various ways to have text wrap around the object in the document.
Theme	A set of unified design elements, such as colors, fonts, and graphics, which provides a consistent look for all pages in a document.
Track Changes	Allows editors to see what changes have been made to the document; insertions, deletions, text repositioning, and formatting changes will be recorded.
Transparency	Set one color in the picture to be transparent.
Undo	A feature to reverse an action (for example, deleting, formatting, adding text, or setting tabs).
View Options	Different ways of being able to view the document, usually to assist in working with the text, page layout, web layout, an outline, or reading.
Watermarks	Can be text, graphics, shapes, or pictures that appear behind text on every page of the document (unless otherwise formatted).
WordArt	Use this feature to create text with decorative effects.
Zoom	A feature that enables you to enlarge or decrease your view of the document.
